DETAILED ACTION

1. Claims 1-8 are pending.

Election/Restriction

2. Applicant's election with traverse of Group VII, Claims 1-8 in Paper No. 11 is acknowledged. The traversal is on the ground(s) that no lack of unity was found in ISR (international Search Report) and in IPER (International Preliminary Examination Report).

This is not found persuasive because the United States Patent and Trademark Office is *not* bound by the lack of unity determination by another International Searching Authority. MPEP 1875 states that whether or not the question of unity of invention has been raised by the International Searching Authority, it may be considered by the examiner when serving as an authorized officer of the International Preliminary Examining Authority. Thus, the Examiner is *not* bound by any previous determination made. In addition, 37 C.F.R. 1.484 indicates that the international preliminary examination is a non-binding opinion. Finally, 37 C.F.R. 1.499 states that, if the Examiner finds that a national stage application lacks unity of invention under 37 C.F.R. 1.475, the Examiner may in an Office action require the applicant in the response to that action to elect the invention to which the claims shall be restricted. Thus, the determination of lack of unity is proper under the PCT treaty.

In regard to the argument: "As stated in MPEP 1875, the examiner may when preparing the IPER consider whether the international application complies with the requirement of unity of invention...", the examiner disagrees with applicants. Since the examiner is not preparing an IPER, the argument is invalid.

The requirement is still deemed proper and is therefore made FINAL.

3. The claims are drawn to multiple inventions for reasons set forth in the restriction requirement. The claims are examined only to the extent that they read on the elected invention. Cancellation of the non-elected subject matter is recommended in response to this Office Action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In amended claim 1 the second proviso (page 16,

Art Unit: 1624

lines 12-17) and in amended claim 4 the two provisos on (page 17) lack descriptive support. Even a negative limitation requires description, *Ex Parte Grasselli*, 231 USPQ 393. The third proviso in claim 1 is also new matter, but it is not relevant because it is drawn to non-elected subject matter.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

a. Claim 1 and claims dependent thereon are rejected because the phrase "general formula" is indefinite. A formula cannot be general, but specific. It is recommended that applicants delete "general" from said phrase to overcome the rejection.

b. In amended claim 1 (page 22, lines 9-10), the phrase "R¹ and R² may be taken conjointly to form a 4 to 7 membered rings" is not clear. Since R¹ and R² are attached to N, it is recommended that the claim read as "R¹ and R² may be taken conjointly with the N to which they are attached to form a 4 to 7 membered rings".

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kahsay Habte, Ph. D. whose telephone number is (703) 308-4717. The examiner can normally be reached on M-F (9.00AM- 5:30PM).
